Week 2 - Project Module 2: OSINT & Google Dorking Reconnaissance

Overview

This module demonstrates the practical application of **Google Dorking (Advanced Search Operators)** for Open Source Intelligence (OSINT). By leveraging specific search parameters, security researchers and analysts can identify misconfigured internet-facing assets, exposed live security cameras, and publicly accessible digital documents.

Task 1: 10 Exposed Security Camera Links & Relevant Dorks

The table below documents 10 publicly accessible, unauthenticated camera streams discovered using standard Google Dork operators.

Camera Link	Relevant Google Dork	Default Username	Default Password
/122.116.41.8:8080	`intitle:"webcamXP" inurl":8080"`	None	None
/109.233.191.130:80	`intitle:"webcamXP 5"`	None	None
/88.34.237.193:81	`inurl:"control/userimage.html"`	None	None
/80.152.138.183/vieme?mode=refresh	`inurl:"viewerframe?mode="`	None	None
/191.96.127.25:8081	`intitle:"Network Camera NetworkCamera"`	None	None
/139.64.168.126:808	`inurl:"cam_1.cgi"`	None	None

Camera Link	Relevant Google Dork	Default Username	Default Password
/95.255.183.164:808	`inurl:"cam_1.cgi"`	None	None
/109.206.96.75:8080	`inurl:"cam_1.cgi"`	None	None
/89.207.169.237:800	`intitle:"Network Camera NetworkCamera"`	None	None
/213.129.132.171/viame?mode=refresh	`inurl:"viewerframe?mode="`	None	None

Task 2: 10 Downloadable Mathematics Ebooks (PDF Format)

The table below lists 10 downloadable open-access mathematics textbooks and reference manuals discovered using PDF-specific dorks across educational domains and open directory indexes.

	Resource Title / Subject	Relevant Google Dork	File Type	Direct Li
	Elementary Calculus Textbook	`site:edu filetype:pdf "Calculus" intitle:"index of"`	PDF	https: 70/res lus.pd
	Linear Algebra & Applications	`site:edu filetype:pdf "Linear Algebra" intitle:"index of"`	PDF	https: aralge
	Ordinary Differential Equations	`filetype:pdf "Differential Equations" intitle:"index of"`	PDF	https: machas equati
	Probability & Statistics Manual	`site:edu filetype:pdf "Probability and Statistics"`	PDF	https: ~cshal
	Discrete Mathematics Notes	`filetype:pdf "Discrete Mathematics" intitle:"index of"`	PDF	https: omes/a otes.p

	Resource Title / Subject	Relevant Google Dork	File Type	Direct Li
	Abstract Algebra Essentials	`site:edu filetype:pdf "Abstract Algebra" "lecture notes"`	PDF	`http:/ /~ec/b`
	Principles of Real Analysis	`filetype:pdf "Real Analysis" intitle:"index of"`	PDF	`https: edu/~h s_pdf/`
	Introduction to Topology	`site:edu filetype:pdf "Topology" "lecture notes"`	PDF	`https: edu/~h .pdf`
	Elementary Number Theory	`filetype:pdf "Number Theory" intitle:"index of"`	PDF	`https: u/jhs/`
	Complex Variables & Analysis	`site:edu filetype:pdf "Complex Analysis"`	PDF	`https: ~ncost df`

Screenshots & Evidence

1. Insecam Live Camera Feed (Captured Stream)

Figure 1: Live camera stream extracted from `http://139.64.168.126:8080` via `inurl:"cam_1.cgi"`.

2. Live Camera Search Results & Interface

Figure 2: Insecam directory search results demonstrating publicly indexed camera devices.

Remediation & Defensive Recommendations

1. **Network Segmentation:** Place internal IP cameras behind a firewall/VLAN and restrict inbound traffic from the public internet.

2. **Access Control:** Enforce strong authentication (disable default/blank logins) and require VPN access to view network feeds.
3. **Robots.txt & Meta Tags:** Configure web servers to restrict web crawlers (`User-agent: * Disallow: /`) to prevent indexing of camera interfaces and internal directories.
